

Change Notice

Epoxy Seal at Base of Terminals

Type of Change:

- Engineering Part Number
 Product Appearance

The epoxy seal at the base of the LB Series terminals is changing. The new light blue epoxy seal has improved adhesive properties. The following devices are affected by this change:

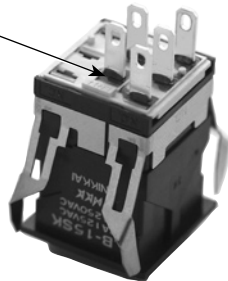

All illuminated and nonilluminated LB Series Pushbutton Switches and Indicators, both standard and custom models

- Round switch and indicator
- Square switch and indicator
- Rectangular switch and indicator
- Panel seal switch

Epoxy Seal

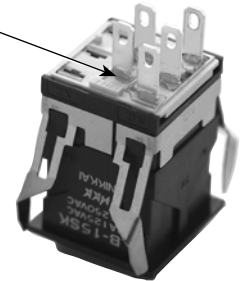

Before Change

Green Epoxy Seal

After Change

Light Blue Epoxy Seal

Note: There is no change to the dimensions of the switches or indicators.

Availability

LB Series changes to epoxy seal will be effective with July 2009 production.
